REASONS FOR ALLOWANCE

attached **“Response to Arguments”**

1. Applicant's arguments, see Amendment filed **8/04/2009**, with respect to claims **13-21** have been fully considered and are persuasive. The rejection of claims **13-21** has been withdrawn.
2. Claims **13-21** are allowable. Claims **1-12** are canceled.

attached “**Allowable Subject Matter/Reasons for Allowance**”

1. Claims **13-21** are allowable.
2. The following is an examiner’s statement of reasons for allowance:
 - a. The prior art made of record, **Ammitzboell in view of RFC 3376** disclose an “a layer 2 switch [that] is able to operate also in a network in which IP multicast routers are present” which, according to applicant on page 2 of the response mailed on 8/04/2009 “only describes a layer 2 device with an IGMP pruning function disposed at VLANs A, B, C.”. Ammitzboell in view of RFC 3376 fails to teach “wherein each **of said Layer-3 switches relays said multicast packets** transmitted from said multicast transmitting terminal (source) through the Layer-2 switch and distributes them to said multicast receiving terminal and transmits said discrimination packet, where each of the Layer-3 switches comprises a decision function unit for deciding if a received packet is the discrimination packet or a general packet other than the discrimination packet and a header processing function unit for processing the MAC header of said received packet and performing different processing in accordance with results of decision of said decision function unit.”
 - b. The prior art made of record, **<USED REFERENCE>** discloses a “a layer 2 switch [that] is able to operate also in a network in which IP multicast routers are present”. **<USED REFERENCE>** fails to teach **the feature of being “sandwiched” which, as specified during the remarks on 11/13/2008 can “be**

understood by one skilled in the art as denoting a structure of having two Layer-3 switches on either side of the Layer 2 switch” Therefore, a “layer 2 switch” inside a network segregated from another network with “routers” (layer 3 switches) does not meet the definition of “sandwiched”.
